SUMMARY OF WORK COMPLETED

The learning curve for our coder has been great. Zach has spent a lot of time coding this project. Carl and Joshua created the Test Scripts as well as the Progress Report.

SUMMARY OF HIGHLIGHTS

The RCTS supports concurrent multi-user functionality. We tested it with three concurrent users.

- Known Bugs/Limitations
  - Since the whole system is undergoing continual work, until the final project, all of the features will not be fully functional (given the database dependencies).
  - Data validation is not implemented yet

MAJOR ISSUES

No Major Issues as of yet.
